LICENSE AGREEMENT
FOR NON-COMMERCIAL RESEARCH USE OF
CVBL-CCTV-FACE DATASET

Introduction

The **CVBL-CCTV-Face Dataset** contains real-world facial images captured using an 8 MP IP Dome CCTV camera (EW-IP8050D) in unconstrained indoor surveillance environments, unlike existing datasets where most facial images are captured in controlled environments or generated through synthetic degradations. The CVBL-CCTV-Face Dataset contains facial images from 223 unique individuals, comprising 15,662 low-quality (LQ) CCTV images and 2,714 high-quality (HQ) reference images. The dataset is provided in two versions. Version A contains 8,090 LQ images and 102 HQ images from 102 individuals, while Version B contains 7,572 LQ images and 2,612 HQ images from 130 individuals. The two versions share nine identities, resulting in 223 unique individuals. The HQ reference images are acquired independently under controlled conditions, making the dataset unpaired and spatially unaligned. The proposed dataset consists of several real-world surveillance challenges, including but not limited to low resolution, motion blur, defocus, sensor noise, illumination variations, occlusions, partially visible faces, side-facing poses, and downward head orientations.

Consent

The researcher(s) agrees to the following conditions on the **CVBL-CCTV-Face Dataset**:

1. The researcher(s) shall have no rights with respect to the Dataset or any portion thereof and shall not use the Dataset except as expressly set forth in this Agreement.

2. Subject to the terms and conditions of this Agreement, the CVBL-CCTV-Face Dataset is available for non-commercial research use only, under a royalty-free, non-exclusive, non-transferable license, subject to the following conditions:

2.1 The Dataset is only for non-commercial research use and is available to those direct research colleagues who belong to the same research institution and have adhered to the terms of this license.

2.2 The Dataset shall not be copied or distributed in any form other than for backup purposes. The Dataset shall not be shared with unauthorized individuals or third parties.

2.3 The Dataset shall only be used for research purposes and shall not be used or included in commercial applications in any form.

2.4 The images in the Dataset shall not be used in any manner that could embarrass, harm, defame, or compromise the privacy or dignity of the individuals appearing in the Dataset.

2.5 Any work made public, regardless of its form, based directly or indirectly on any part of the Dataset shall include the following reference:

M. Das, A. K. Yadav, S. R. Dubey, and S. K. Singh, "CVBL-CCTV-Face Dataset for Real-World Face Enhancement and Recognition in Surveillance", 5th IEEE International Conference on Computer Vision and Machine Intelligence (CVMI), Pune, India, Oct.–Nov. 2026.

I hereby agree to abide by the terms and conditions of this license agreement.
